

# NIGHTCOVERS AUSTRALIA

## ENERGY TECHNOLOGY

ABN 98 099 991 563

### The Best High-Performance Magnetic Nightcover IN CASSETTE WITH POWERFUL NON SLIP MAGNETS ON BOTTOM BAR RESULTS OF TEST CONDUCTED ON MULTI-DECK TYPE DAIRY CABINET.

Test conducted during winter period May to August Air cooled type 7.5 h.p unit. -  
Location - Maroochydore QLD.

	Day KwH	Night KwH	Combined KwH	Unit Hours KwH
2 weeks without Nightcovers	- 407	441	848	185.5
2 weeks with Nightcovers	- 240	243	485	108.5
Units Saved with Nightcovers	- 167	198	365	77.1
Consumption Saved with Nightcovers	- 41%	45%	43%	42%
Overconsumption without Nightcovers	- 70%	81%	76%	71%

### LET NIGHTCOVERS POWER SAVERS TURN WASTE INTO PROFIT. SAVES CENTRAL HEATING IN WINTER MONTHS

This invention is a cold air wave shielding screen for use on showcase with refrigeration, the invention can prevent the breeding of germs because it is made from aluminium threads and synthetic resin threads which has been coated with antibiotics. It can cut down on electric power use and extends the life span of the equipment.

The invention is a fabric which is made from thin aluminium thread and transparent of opaque synthetic resin thread, and then that surface is coated with antibiotics.

The fabric has good insulating properties, in this way we are able to conserve energy by keeping power consumption to a minimum. Finally the life of the equipment is extended.

The cold air waves, Nightcovers has aluminium thread naturally ventilates which maintains the humidity, so foods are always kept fresh.

Aluminium is antibacterial, and coated by antibiotics in addition to the synthetic resin thread coated by an antibiotic substance, this would meet highest hygiene. There will be no condensation with NIGHTCOVERS in use.
